CREDO

Our core team has been involved in projects around the globe. Korea Consulting on European target markets for prefabrication and robotic Japan site-factories solutions **Germany & Spain** France Iran Large-scale prefabrication. Eastern Europe Prefabrication construction & Prefabrication solutions STCRs & automated/ for construction in PC buildings, standardisation Construction of PC & Russia robotic site-factories. USA collaboration with car and technology management, schools: mobile field robotics for civil manufacturers, service and advanced construction factories, modular Implementing engineering applications equipment Automation/robotic maintenance robotics building and infill automated/robotic technology in the context kits, design for prefabrication & of circular economy and manufacturing and construction, automated future habitat, modular assembly/ROD formwork systems, integrated construction aerial robots Asia Robotic construction equipment, sky factories. solutions for future habitat **Africa** resilient & smart cities In situ resource utilisation China & robotic construction of future adaptable habitat. Developing strategies for reverse innovation the automation of prefabrication and on-site **Singapore** robotics, standardisation strategies, digital twins 1st automated building Middle East & South America and AI in construction construction system of country, development of Large-scale building stock transformation. high-level governmental support of start-ups and spin-offs strategies
